I am a passionate Software Engineer graduated from Chiang Mai University. I currently work for INET Chiang Mai. I work on developing web applications using Node.js, Nest.js, React.js, Vue.js, AWS, SQL, Omise, Supabase, and Docker.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, PHP, SQL

Frameworks: Node.js, Nest.js, Express.js, React.js, Next.js, Vue.js, Django, Laravel

Developer Tools: Git, Docker, Visual Studio Code, Postman, AWS, Cyberduck, DBeaver, MySQL Workbench, Swagger, MongoDB, Firestore, Omise, Supabase, Vercel, OpenVPN

EXPERIENCE

INTERNET THAILAND PUBLIC COMPANY LIMITED

October 2022 – Present

Developer

Chiang Mai, Thailand

- Developed a REST API and MySQL Workbench to store data
- Developed a full-stack web application using Node.js, Nest.js, Javascript, Vue.js, MySQL, AWS and Docker

PROJECTS

School management | *Node.js, Nest.js, TypeORM, MySQL, Vue, Nuxt, AWS S3, Docker*

- Developed a web application using with Nest.js serving a REST API with Vue as the frontend.
- Implemented authorization (login and register) with related web application.
- Implemented API across multiple microservices (backend order payment authorization) and 3rd party.
- Created CRUD for many collections such as course, coach, student, period, package, date, time, check in, potential, leave, reserve, order, payment and cron-job for send notification scheduling.

University document management | *Node.js, Nest.js, TypeORM, MySQL, Vue.js, Nuxt, AWS S3, Docker*

- Maintained document setting for multiple approvers.
- Created a new collection where each document may or may not have its own watermark.
- Implemented with watermark service to stamp watermark on documents.
- Implemented to email service. Documents are sent to student email when transaction is successful.

Internal sale web application | *Bun, Elysia.js, MongoDB, Vue.js, Docker*

- Developed order transaction flow, user approval, send an automatic email upon successful approval, save email log, show email history, the dashboard for team leaders displays transaction documents based on search filters.
- Implemented API from 3rd party such as business, position, and department.
- Developed with clean code, separate functions, reuseable and easy for maintenance.

E commerce and store management | *React.js, Next.js, Supabase, Supabase Edge Function, Omise, Vercel*

- Developed a full-stack web application using Next.js (App Router, Pages Router, Middleware) integrated with Supabase for server-side authentication.
- Applied PostgreSQL Row Level Security (RLS) policies to ensure users can only access and modify their own data.
- Implemented Omise using Supabase Edge Function to update automatic online payments.
- GitHub Actions with Vercel Deploy Integration to automate deployments to production.

Pet grooming store management | *React.js, Next.js, Nest.js, PostgreSQL, AWS, Docker, Nginx, Vercel*

- Deployed backend services on AWS EC2 (Ubuntu) using Docker and docker-compose, including application server, PostgreSQL database, and Nginx reverse proxy.
- Configured Nginx to route external traffic to backend services securely within the EC2 instance.
- Deployed frontend application to Vercel (UAT environment) and configured runtime environment variables.
- Successfully validated end-to-end communication between Vercel frontend and EC2 backend via REST API.

EDUCATION

Chiang Mai University

Bachelor of Computer Engineering

GPA 2.86 – TOEIC 695

August 2018 – March 2022
